High Precision Tools for 3C Industry

Computer | Communication | Consumer Electronics

The rising demands on the 3C Industry to offer products - which are lighter, thinner and more portable - at reduced costs call for continuous innovation and progress on the technology and material front.

The High Precision and high-volume production need high quality and consistent production resources.

To meet these demands, continuous innovation and progress on the technology and material fronts are essential. Advancements in various areas contribute to achieving the desired outcomes.

We at AXIS Microtools, with a legacy of 35 years of developing High Precision Tungsten Carbide mICRO Tools for very demanding applications across industries, are equipped to offer solutions for the machining needs of the 3C Industry.

We bring a blend of experience and expertise and State-of-the-Art technology infrastructure to offer High Precision and High-Performance Tools. We work collaboratively as your Tooling partner and provide end to end – design to run off – support and solutions.

PCB Chip Breaker Routers	High Precision PCB Specials	PCB 2 Flute Aluminium Routers	High Precision Drills	T-Slot Cutters	Dovetail Cutters	2 Flute Special Form Tools	Special Form Tools	3 Flute Form Tools	3 Flute Special Form Tools	High Precision Chamfering Cutters	3 Flute Front and Back Chamfering Tools		4 Flute Special Form Tools	Special Trepanning Tools
